

Interested in extending the impact of your work?

OPEN ACCESS

Open Access (OA) facilitates the broad dissemination of faculty research and scholarship. Please join us for presentations by two dynamic speakers who will address different aspects of OA issues.

Monday, April 12, 2010
Dr. Martin Luther King, Jr. Library
Rooms 225/229, 2nd Floor
11:00 a.m. - 2:00 p.m.

Enhancing and Measuring the Value and Impact of Biomedical Research

Presentation 11:15-12:15

Liz Williams, Associate Editor for PLoS Biology

The Public Library of Science (PLoS), a pioneer in the world of open access publishing, strives to make scientific content accessible to everyone. This talk will discuss how OA publishing enhances the value of scientific publications and how new PLoS initiatives strive to improve the metrics used to measure article value and community impact.

What's the Deal with Open Access?

John Willinsky, Professor, Stanford University School of Education

Now that a quarter of the peer-reviewed literature published annually ends up open access, it may be time to ask what it means for our research and instruction, for our societies and journals, for our contribution and place. This talk will outline some of the current answers, with an eye to the choices ahead.

Presentation 12:30-1:30
